

PASSIVE SAFETY TEST SYSTEMS

ARIES offer turn-key solutions for the automotive testing industry:

- Laboratory definition and specification.
- Civil works design and supervision.
- Testing systems development and supply.
- Commissioning and training.
- Operation, maintenance and after-sales support.

ABOUT ARIES

- Independent engineering company.
- Founded in 1985.
- Based in Madrid, Spain.
- Presence in over 30 countries.
- More than 1000 systems delivered, installed and supported.

ACTUATORS STANDARD PERFORMANCES

Ideal for R&D, regulation compliance and evaluation, ARIES develops full-scale crash test laboratories for complete vehicle structure testing:

- Frontal Impact
- Side Impact
- Rear Impact
- Car-to-Car
- Low Speed
- Rollover
- Integrated Sled

ACTUATORS STANDARD PERFORMANCES

ARIES sled systems faithfully reproduce inertial effects of real crashes without destroying the vehicle.

Propulsion: AC Motor - Bungee Cords

Deceleration: Bending Bar - PU Tubes

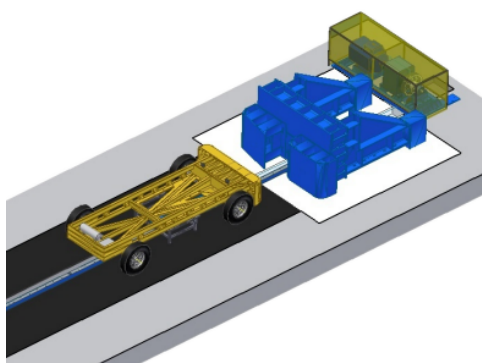

ACTUATORS STANDARD PERFORMANCES

ARIES has developed various systems for bumper testing to comply with main international standards:

ECE - FMVSS - CMVSS - RCAR - IIHS - ALLIANZ - ...

LOW SPEED CARSH

BUMPER PENDULUM

GRAVITY IMPACTOR

IMPACTOR LAUNCHERS

ARIES launcher family is designed to test pedestrian safety and components.

UNIVERSAL LAUNCHER

LITE LAUNCHER

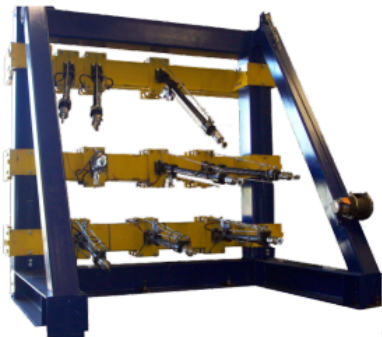

COMPACT LAUNCHER

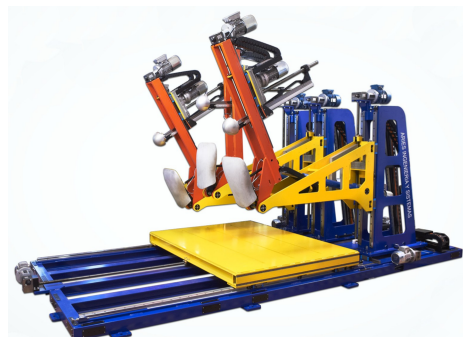

The launchers are designed to have the flexibility to install different impact modules: Ejection mitigation, free flight head form, interiors pendulum, leg forms, misuse, knee form, head forms, FMH...

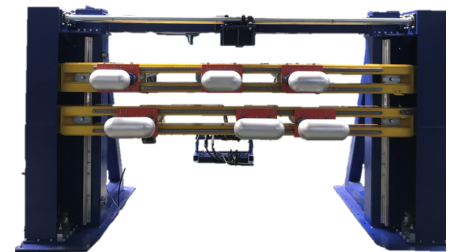

STATIC TESTING SYSTEM

SEAT BELT ANCHORAGE

SEAT AND HEAD RESTRAINT

SEAT RESISTANCE

AUXILIARY TESTING EQUIPMENT

ARIES offers integrated turn-key solutions for any passive safety laboratory. From full, multidisciplinary laboratories to auxiliary equipment integrated into existing facilities.
